*Fabbrica di Penne Stilografiche*  
CAV. ARMANDO SIMONI  
BOLOGNA • VIA ORBI N. 4

Although many are the makes of fountain pens on the market, OMAS pens have been able to attain an outstanding position in the trade and this without pushing, without a glamorous advertising campaign but carried so far, it can be said, only by the exceptional merits of the goods themselves.

Two principles, in fact, have always informed the manufacture of OMAS pens and pencils: technical perfection, which ensures the satisfaction of the public, and reasonable prices which enable the retailer to increase his sales.

The style, the dependability, the perfect working and low prices of all OMAS products are well known, it is therefore with justifiable pride that OMAS present to you in these pages their latest production comprising a very wide and varied range of models which can hold their own against those of any other make in the world.

**OMAS EXTRA, ROUND** - In three sizes and ten different colours. Its first class workmanship and quality makes it intensely practical and completely reliable. It will last you a lifetime.

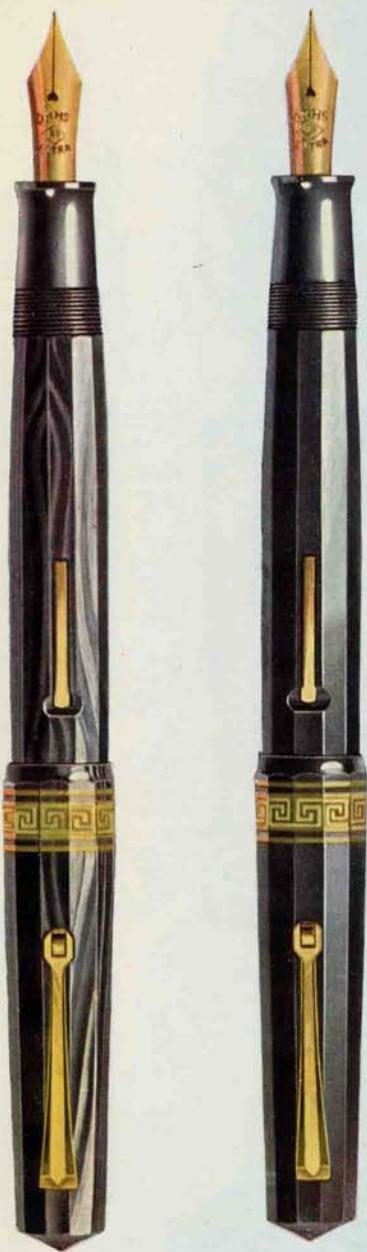

**OMAS EXTRA 341** - A small size fountain pen with faceted barrel especially designed to be carried in ladies handbags. An aristocrat among fountain pens, handsome to look at, jewel finished in every detail, it is bound to appeal to all women of taste. Available in ten beautiful colours with nibs to suit any hand.

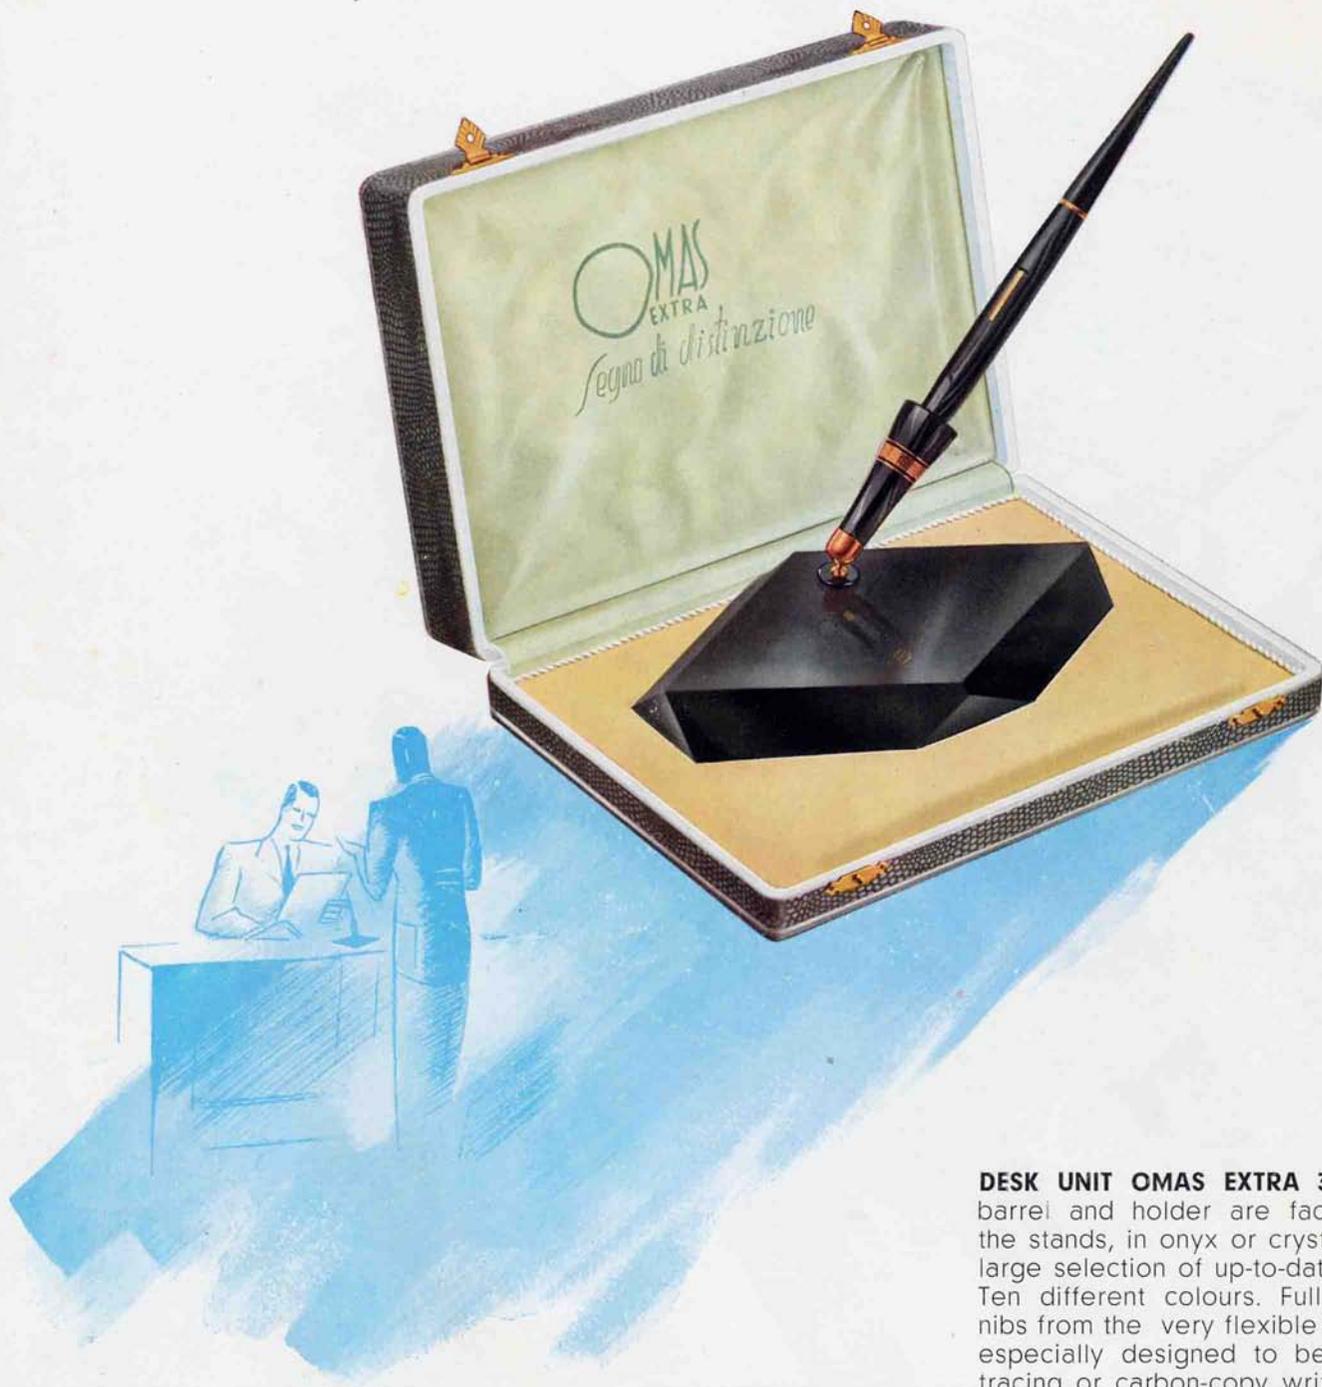

**DESK UNIT OMAS EXTRA 559** - A desk unit is a good thing so long as it works properly: here is a unit you can rely upon completely. It will last you practically for ever and does not need any special care. Stands in onyx or crystal, in ten different colours to harmonise with any kind or style of writing table. Nibs to suit any hand and special nibs to be used as « stylos » or tracing pens for ornamental or carbon-copy writing.

**OMAS EXTRA 335 AND SET 334** - The shape of the barrel not only gives this pen a stylish appearance, but makes it easier to hold. The barrels of the OMAS EXTRA are not moulded but manufactured on special lathes and milling machines to ensure the perfect finish of each piece. In ten beautiful colours.

**DESK UNIT OMAS EXTRA 340** - Both barrel and holder are faceted and the stands, in onyx or crystal, offer a large selection of up-to-date designs. Ten different colours. Full range of nibs from the very flexible to the one especially designed to be used for tracing or carbon-copy writing. There are no better desk units than OMAS EXTRA.

**OMAS** presentation cases are designed and manufactured with the same care as the pens and pencils they hold. A case improves the appearance of what it contains; no case does this better than an OMAS for an OMAS pen or forget pencil. Don't it when making a present. An OMAS case is the best you can buy.

**OMAS LUCENS** - This pen, supplied in two sizes and four colours, is made of an unbreakable, transparent material. Owing to its patented filling device, the OMAS LUCENS has an extra-large capacity and full ink visibility. Perfect efficiency, dependability and durability are ensured by its very accurate workmanship. A wide range of nibs of all kinds is also available.

**OMAS LUCENS EXTRA** - In three colours and two sizes, this pen is the finest fountain pen at present on the market, having all the features of a perfect up to date pen, while the unique smartness of its design puts it in a class by itself. It is fitted with a special nib which, in the usual position, provides a normal semi-flexible point for general use, whilst, when reversed it can be used for tracing or writing carbon copies.

The filling device of the OMAS LUCENS is the simplest and most satisfactory that can be had as it has no parts liable to wear out, such as levers, rubber sac and the like. It consists mainly of the holder itself filled by a pump-like action so that a much greater space is available for holding the ink.

OMAS fountain pens have a very wide range of nibs, from the hardest to the softest point to suit every type of hand. We particularly recommend the reversible model which can be used to write normally as required and, by turning over the pen, becomes a proper « stylo » or tracing pen best suited when carbon copies are needed.

## An ink clear to the last drop

Owing to the absolute purity of its components, OMAS ink remains free from sediment to the last drop. Available in six colours: black, blue-black, blue, violet, green and red which retain their brilliancy for any length of time.

Use OMAS ink if you want perfect ink visibility in your fountain pen.
